

KIWO DUAL PREP

(formerly KIWO 90020)

1. DESCRIPTION

KIWO DUAL PREP is a combination degreaser and wetting agent especially effective for applying capillary films. It is suitable for all mesh types. KIWO DUAL PREP solution emulsifies dirt and grease, making them water soluble. A strong foaming action accelerates the degreasing process. The foam serves as an indicator for complete rinsing. Due to the wetting agent properties, a smooth film of water, ideal for adhering capillary film, will be left on the mesh.

2. APPLICATION

Squirt or spray the solution onto the wet screen and brush from both sides using a Nylon bristle brush until the foam is distributed equally over the screen. Then rinse with water until it runs free of foam. Apply the water-transferable film according to instructions.

If a direct emulsion is to be used, dry the screen and coat in the normal manner according to the manufacturer's prescribed method.

3. PHYSICAL DATA

Color:	Light tan
Consistency:	Liquid
Shelf life:	1 year at 68° Fahrenheit (20° Celsius)
Flash point:	Not applicable
TLV:	Not applicable
VOC:	None
pH value:	7-8
HMIS rating:	Health - 1 Flammability - 0 Reactivity - 0

4. PERSONAL PROTECTION

It is recommended to wear protective glasses and gloves. See Material Safety Data Sheet for additional information.

5. ENVIRONMENTAL PROTECTION

KIWO DUAL PREP can be eliminated through biological decomposition in adapted waste water treatment plants. The working solution can generally be emptied into the drains. Consult local authorities for local regulations.

6. PACKAGING

1 US quart, 1 US gallon, 5 US gallon pail, 55 US gallon drum
